Pedia - canva-prompts (EN)

canva-prompts.md

Per-slide briefs for building the pitch deck in Canva. Each block is self-contained: copy-paste into Canva Magic Design or hand to a teammate designing that slide. All graphic constraints are baked in so the five slides ship consistent.

Global graphic constraints (apply to every slide)

Brand colors (from `BRAND.md`, post green-swap):

Role	Hex
Green primary (parent, CTA, accents)	`#4D9F7D`
Green mid (soft accents, chips)	`#6FB58A`
Green soft (backgrounds, blobs)	`#8BC9A5`
Green tint (pale wash)	`#E8F1EA`
Blue primary (physician, headlines)	`#1E3A8A`
Blue accent (links, sparklines)	`#3B82F6`
Blue tint (physician cards)	`#DBE5F7`
Ink strong (body)	`#0F172A`
Ink medium (secondary body)	`#475569`
Ink faint (source tags, captions)	`#94A3B8`
Border	`#E2E8F0`
Page background (neutral)	`#F7F9FC`

Role	Hex
Pastel green page (warm alt)	`#F4F9F5`

Typography:

- Display / headlines / numbers: **Fraunces** (serif), weight 500 or 600, optical sizing on.
- Body / captions: **Inter**, weight 400 or 500.
- Source tags, timestamps, small mono: **JetBrains Mono**, 10 to 11 pt, color `#94A3B8`.

Aspect ratio: 16:9, 1920 x 1080.

Do not:

- Use em dashes (use hyphens, colons, or parentheses).
- Use the color orange anywhere. The palette is green + blue + neutrals only.
- Use stock illustrations of smiling doctors. Real screenshots of `Pedia.html` on slides 2 and 3, real team photos on slide 5.
- Use "revolutionary", "best-in-class", "cutting-edge". Numbers, not adjectives.
- Drop the source tags. Every number needs `[MIT]` or `[HPO]` visible somewhere on the slide.

Slide 1 - Hook (0:00 to 0:20)

One-line brief: dark background, massive serif, three beats revealing one principle, two numbers, then the brand mark.

Layout:

- Full-bleed background `#0F172A` (ink strong).
- Three text beats, left-aligned, padded 80 px from left, vertically centered.
- Final beat ("Pedia.") is right-aligned, italic, one line below the two-number line.

Text content (exact):

```
In pediatrics,
symptoms don't speak.
Parents do.
```

then click-reveals:

```
180 days lost between visits.
4 years to diagnose a rare disease.
```

then:

```
                                        Pedia.
```

Colors:

- Background: `#0F172A`.
- Three-line principle: white `#FFFFFF`.
- Two stats: white, with the numbers "180 days" and "4 years" bolded in green `#6FB58A`.
- "Pedia." in green primary `#4D9F7D`, italic Fraunces 600.

Typography:

- Principle lines: Fraunces 500, 64 pt, line-height 1.15, tracking -0.01 em.
- Stats: Inter 500, 22 pt, color white; numbers Fraunces 600, 28 pt, color `#6FB58A`.
- "Pedia.": Fraunces 600 italic, 56 pt.

Bottom-right corner: small JetBrains Mono 10 pt `[MIT]`, color `#94A3B8`.

Do not: add logos, tagline, pedia mark in the first two beats. The slide starts spartan on purpose.

Slide 2 - Anamnesis comparison (0:20 to 1:20) - hero slide

One-line brief: split-panel same-child-two-views. Left is warm paper scribble, right is clinical structured report.

Layout:

- Full-bleed 16:9 split vertically 50 / 50.
- Left panel: pastel green `#F4F9F5` background, simulated paper texture (subtle noise).
- Right panel: white `#FFFFFF` background, 4 px left border in blue primary `#1E3A8A`.

Left panel content (handwritten scribble, serif or cursive):

```
Louis, 2y
-> sleep?
-> langage... retard
"ok au repas"
```

```
crèche ?
follow up 3mo
```

Cross out "retard" with a thin hand-drawn line.

Left panel column title (top, 12 pt uppercase, letter-spaced 0.08 em, color `#475569`): `What the doctor writes during the visit`

Right panel column title (same style, color `#1E3A8A`): `What Pedia hands the doctor before the visit`

Right panel options (pick one at build time):

- **Option A (preferred)**: direct screenshot of `Pedia.html` screen-4, cropped to the "Résumé narratif + anamnèse parentale" block on the left 7 columns. Crop tight, 1600 x 1200 minimum, PNG. Insert full-bleed into the right panel, add the 3 px blue left border on top. Zero rebuild.
- **Option B (fallback)**: rebuild the table in Canva using the row structure below. Use this only if the screenshot is too text-dense at final export size.

Right panel table rows (for Option B, or to verify the screenshot content) (clinical typography, 11 to 12 pt, every row aligned in a 2-column grid with a 110 px left column for category labels):

Category (`#94A3B8`, 9 pt uppercase)	**Value (`#0F172A`, 12 pt)**
Chief complaint	Recurrent sleep-onset crises (14 episodes / 4 mo) + expressive-language stagnation
Personal history	Bronchiolitis at 8 mo, 3 otitis, no hospitalization
Family history	Maternal uncle, adult ASD diagnosis
Nutrition	Refuses soft textures since W-8
Timing	Crises cluster 8 pm to 10 pm, 11 of 14 follow a daycare day
Triggers	Worse after collective care, relieved by rhythmic rocking
Associated signs	Object-lining play (12 mentions), hand stereotypies
Circle corroboration	Daycare educator reports same lining (4 mentions)

Inset at the bottom of the right panel (green accent block): `From 47 parental observations, frequency, intensity, duration, triggers, via HPO ontology.` Background `#E8F1EA`, left border `#6FB58A` 3 px, text `#0F172A`, 10 pt Inter.

Bottom-right source tag: `[HPO - Monarch Initiative]`, JetBrains Mono 10 pt, `#94A3B8`.

Typography:

- Scribble: handwritten feel font (e.g. Caveat), 20 pt, color `#2D3B36`.
- Right panel headers: Inter 600, 11 pt uppercase letter-spaced.
- Right panel row labels: JetBrains Mono 9 pt uppercase, color `#94A3B8`.
- Right panel row values: Inter 400, 12 pt, color `#0F172A`.

Do not: make the left panel neat or apologetic. The contrast is the whole point. Messy scribble, crossed words, fragments.

Slide 3 - Product (1:20 to 2:00)

One-line brief: three interface screenshots from `Pedia.html` in an equal-weight horizontal grid, with a one-line caption above each.

Layout:

- White background `#FFFFFF`.
- Top line: `Prescribed by the physician, multimodal, multilingual pediatric journal.` Inter 500, 18 pt, color `#475569`, centered, 40 px from top.
- Three equal-width cards side by side, 24 px gap between, full vertical extent below the top line.
- Card 1 (parent): pale green background `#E8F1EA`, 3 px left border `#4D9F7D`.
- Card 2 (pipeline): pale gray background `#F7F9FC`, 3 px left border `#94A3B8`.
- Card 3 (physician): pale blue background `#DBE5F7`, 3 px left border `#1E3A8A`.

Card content:

Card 1 (parent):

- Mono badge top: `PARENT`, 9 pt, color `#94A3B8`.
- Screenshot: `Pedia.html` screen-2 (parent phone with voice CTA).
- Caption below screenshot: `Hold to speak. 30 seconds.` Fraunces 500, 18 pt, color `#2D3B36`.

Card 2 (pipeline):

- Mono badge: `PIPELINE`, 9 pt, `#94A3B8`.
- Screenshot: `Pedia.html` screen-3 (voice capture + HPO pipeline panel).
- Caption: `Transcription, HPO mapping, HDS hosting.` Fraunces 500, 18 pt, color `#0F172A`.

Card 3 (physician):

- Mono badge: `PHYSICIAN`, 9 pt, `#94A3B8`.
- Screenshot: `Pedia.html` screen-4 (top half: patient banner + narrative anamnesis).
- Caption: `2-minute read before the visit.` Fraunces 500, 18 pt, color `#1E3A8A`.

Bottom-right source tag: `[HPO]`, JetBrains Mono 10 pt, `#94A3B8`.

Do not: invent product illustrations. Use the real `Pedia.html` screenshots at 1440 x 900 PNG, cropped tightly to the phone or dashboard area. No mockup frames around them. No drop shadows (the cards already have borders).

Slide 4 - Business (2:00 to 2:45)

One-line brief: seed one-pager layout. One headline, a three-tile pricing row, a four-line numbers strip, and an ask block.

Layout:

- White `#FFFFFF` background, 52 px page padding.
- Headline, top, Fraunces 500, 26 pt, color `#1E3A8A`, with the phrase "Parents always free" colored green primary `#4D9F7D` and italic.
- Three pricing tiles side by side, equal width, 16 px gap.
- Single-line unit-economics strip below, centered.
- Two-column ask block at the bottom: KPI on the left, ask on the right.

Headline text: `Prescribed by the physician, paid by the medical structure. Parents always free.`

Pricing tiles (each 14 px padding, border-radius 8 px, 1 px border `#E2E8F0`, 3 px left border in the tile's color):

Tile 1 (parent)	Tile 2 (pediatrician)	Tile 3 (hospital)
role: `PARENTS` (mono 10 pt `#475569`)	role: `INDEPENDENT PEDIATRICIAN`	role: `HOSPITAL SERVICE`
price: `Free` (Fraunces 22 pt `#4D9F7D`)	price: `€49 / mo` (Fraunces 22 pt `#1E3A8A`)	price: `€12k / yr` (Fraunces 22 pt `#1E3A8A`)
roi: `Forever` (Inter 11 pt `#475569`)	roi: `Recovers 11 h, ROI x21`	roi: `Payback < 6 months`

Tile 1 (parent)	Tile 2 (pediatrician)	Tile 3 (hospital)
background `#E8F1EA`, border `#4D9F7D`	background `#DBE5F7`, border `#1E3A8A`	background `#DBE5F7`, border `#3B82F6`

Unit-economics strip (centered, Inter 11 pt, color `#475569`, with key values in `#0F172A` bold): `CAC < €300 . LTV > €1,800 . LTV / CAC > 6 . Churn < 2%/mo . GM > 85%`

Bottom-left KPI block:

- Label: `NORTH-STAR KPI` (mono 10 pt `#94A3B8`)
- Statement: `>= 2 min saved per consultation.` (Fraunces 18 pt `#0F172A`)
- Subtext: `Measured in a 50-pediatrician chronometered pilot.` (Inter 11 pt `#475569`)

Bottom-right ask block:

- Label: `PRE-SEED ASK` (mono 10 pt `#94A3B8`)
- Amount: `€400k` (Fraunces 24 pt `#4D9F7D`)
- Three bullets (Inter 11 pt `#0F172A`):
  - `50-pediatrician chronometered pilot`
  - `CE marking class I`
  - `Two paying hospital contracts`

TAM callout (right side, small, under the headline): `TAM France: €31M. Europe next on the HPO interoperability rail.` Inter 12 pt, color `#475569`.

Optional right-side thumbnail (anchors the fact that the product exists): a 320 px wide screenshot of `Pedia.html` screen-4 (physician dashboard top), faded to 60% opacity or overlaid behind the ask block so the numbers stay readable. Keeps "this is real, not a pitch fiction" in peripheral vision.

Bottom-right source tag: `[MIT]`, JetBrains Mono 10 pt `#94A3B8`.

Do not: include an ARR projection (no Y1/Y2/Y3 curves). Do not include M3/M6/M12 milestones. Keep the slide about what we charge, why price < ROI, and what we do with the money. No roadmap timeline.

Slide 5 - Team + cascade close + thank you (2:45 to 3:00)

One-line brief: six faces in a clean grid. Human-scale close. The last thing the jury sees.

Layout:

- Pastel green page background `#F4F9F5`.
- Top headline, centered, Fraunces 500, 28 pt, color `#0F172A`: `Two physicians. Four engineers. The pairing is the moat.`
- Six square portraits in a single row (or 3 x 2 grid if vertical space is tight), equal size, 16 px gap.
- Each portrait has a green accent strip at the bottom (`#6FB58A`, 4 px tall) with the name above the strip and role below.
- Cascade close at the bottom, centered, Fraunces 16 pt italic, color `#0F172A`, with the three bold-green terms: `Parents pay zero`, `Children gain years`, and `two euros a day`.

Portrait specs:

- Square crop, 600 x 600 minimum, head and shoulders, neutral background, consistent lighting.
- Filename suggestion: `team/fanette.jpg`, `team/elom.jpg`, `team/raoul.jpg`, `team/raphael.jpg`, `team/ayda.jpg`, `team/anouar.jpg`.

Name + role (below each portrait, centered):

Name (Inter 600, 13 pt, `#0F172A`)	**Role (Inter 400, 11 pt, `#475569`)**
Fanette	dev
Elom	dev
Raoul	dev + business
Raphaël	dev + business
Ayda	MD
Anouar	MD

Cascade close (bottom of slide, centered, max width 900 px, Fraunces 16 pt italic):

`A pediatrician pays two euros a day, recovers eleven hours a month. Parents pay zero. Children gain years of avoided diagnostic wandering.`

Bold-green these three phrases: `two euros a day`, `Parents pay zero`, `Children gain years`.

Final word, centered below the cascade, Fraunces 500, 20 pt, color `#0F172A`: `Thank you.`

Do not: write "Team" as a slide title. The faces are the title. Do not use Linkedin headshots with different backgrounds. Shoot all six in the hackathon space Saturday afternoon if needed, same wall, same light.

Build order (recommended)

1. Slide 3 first: captures lock the product story in place.
2. Slide 2 next: the hero comparison. If Slide 2 is weak, the pitch is weak.
3. Slide 1: drop in the text, pick the font sizes.
4. Slide 4: assemble from this spec. No free-hand rewriting.
5. Slide 5 last: team photos after the Saturday shoot.

Screenshot catalog

All screenshots captured from `Pedia.html` at 1920 x 1080 display, then cropped as needed. Export PNG, sRGB. Save under `final-pitch/screenshots/`.

ID	Source screen	Crop	Used on	Export size
`S1-hero`	screen-1	full hero + phone mock in corner	optional slide 1 background at 15% opacity	1920 x 1080
`S2-parent-phone`	screen-2	phone only, tight crop around the device frame	slide 3 card 1	720 x 1480
`S3-voice-capture`	screen-3	phone only, mic pulse + waveform visible	slide 3 card 2	720 x 1480
`S3-pipeline-panel`	screen-3	left context panel (transcription, NER, HPO, anonymization)	slide 3 card 2 alternate	640 x 720
`S4-dashboard-top`	screen-4	patient banner + narrative anamnesis block (left 7 columns)	slide 2 right panel (Option A), slide 3 card 3, slide 4 background thumbnail	1600 x 1200
`S4-anamnesis-block`	screen-4	narrative anamnesis block only, no patient banner	slide 2 right panel (tighter crop)	1200 x 1400
`S4-timeline-signals`	screen-4	lower half: 4-month timeline + weak signals	backup for slide 3 card 3	1600 x 900
`S4-pathways`	screen-4	right column "pistes à explorer" block	Q&A backup visual	800 x 1200

ID	Source screen	Crop	Used on	Export size
`S5-recap`	screen-5	product recap strip	not used in pitch, brand consistency reference	1920 x 600

Capture method: open `Pedia.html` in Chrome at 1920 x 1080, use `Cmd/Ctrl + Shift + P -> "Capture screenshot"` via DevTools. For tight element crops: right-click the element in DevTools, `Capture node screenshot`. Avoid browser zoom (always 100%). Avoid extensions that overlay badges.

Patient consistency: every screenshot shows **Louis M., 2 yrs**. If the team picks a different first name for the story, edit `Pedia.html` first, re-export all screenshots in one pass, then import into Canva.

File naming: `S{screen}-{what}.png`, lowercase, hyphenated. Example: `S4-dashboard-top.png`.

Export settings

- PNG export at 1920 x 1080, sRGB.
- Google Slides backup: import each PNG as a full-bleed slide background, overlay the source tags as editable text so timings can be adjusted last-minute.
